EDUCATION

FEU Institute of Technology | B.S. Computer Science, Specialized in Software Engineering July 2024 - Present

Leadership & Involvement: ACM TechSprint Hackathon (**1st Runner-Up**) | **Project Manager**, DevkadaPH Hackathon Team | **Cloud Associate**, AWS Student Builder Group – Celestia | Linux & Cloud Educator on TikTok (**600K+ views**) | AI Factory Hackathon

EXPERIENCE

Autolube Corporation August 2023 - July 2024

Graphic Artist Novaliches, QC

- Designed 100+ marketing materials for digital and print campaigns.
- Produced promotional graphics for Facebook, Instagram, Shopee, and Lazada to support digital marketing campaigns.
- Created and refined product packaging for multiple automotive products, integrating branding, product information, and visual hierarchy to create professional, market-ready packaging.

PROJECTS

Nestra | Microblog [Github Repository](#)

- Built a full-stack microblogging platform using Flask with secure authentication and relational database integration.
- Containerized the application with Docker and implemented a CI/CD pipeline to automate testing and deployment.

Prodini | Interstitial Journaling App [Github Repository](#)

- Built a cross-platform productivity tracker using Electron and Flask that automatically records application usage and work sessions for interstitial journaling.
- Designed with SQLite and interactive dashboards to visualize productivity trends and user activity.

Kokak | Frog-themed wordle game for Filipino dialects [Github Repository](#)

- Built a full-stack educational web application inspired by Wordle that helps users learn Philippine regional languages through AI-assisted gameplay and community-contributed vocabulary.
- Built the backend for Kokak.ph using Express.js, Gemini API, Neon (PostgreSQL), and developing RESTful APIs that support multilingual dataset collection through an educational, gamified platform.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, SQL, HTML/CSS

Frameworks & Libraries: Flask, Electron

Cloud: AWS (IAM, EC2, S3, CloudFront, VPC)

Databases: PostgreSQL (Neon), Supabase, SQLite

Technologies: Linux, Git, REST APIs, Docker

CERTIFICATION

- Information Technology Specialist: Python — Certiport [Credential](#)
